

INNOBYTE is looking for a **Magento Developer** fluent in e-commerce web technologies for our Bucharest office. The goal of this position is to build customized e-commerce sites on Magento platform (Community Edition and Enterprise Edition), for worldwide customers.

Responsibilities:

- Work in a great team together with Project Managers, Web Developers, Front End Developers, Quality Assurance Engineers and System Administrators
- Analyze client business requirements and recommend innovative solutions / provide estimates when needed
- Collaborate with the team in order to understand the client needs and communicate project progress
- Determine the best approach to solving complex business problems with technology and write great & documented code to accomplish this
- It is expected that you will be passion driven with a sharp attention to details, especially for embracing new technologies (like Apache SOLR, Varnish, MongoDB, Node.js)

Requirements:

- Experience working with Magento platform (preferably a completed project, module development or a theme integration)
- Proven PHP experience and great knowledge of OOP in PHP5
- Solid background in working with MySQL database
- Experience working with a PHP framework (preferably Zend or Symfony 2)
- Good knowledge of Javascript (preferably jQuery or Prototype)
- Basic Linux knowledge

Nice to have:

- Experience working with a version control system such as GIT/SVN/Mercurial
- Experience with PHPUnit
- Experience with Apache SOLR
- Experience with Web services, XML, AJAX and integration with 3rd party providers like Facebook, Twitter, Youtube, Google

- Ability to analyze and troubleshoot staging and production implementations, security and performance
- Fluent with Linux
