.NET Software Developer

Job overview:

Cegeka uses an agile software development approach to deliver the highest value to the customer. 'The agile software factory' is a team of one hundred agile developers, customer proxies and scrum masters. We work in intense and close cooperation with the customer.
You'll be working in an established and proven agile environment, with quality oriented developers, like yourself.

Our projects are based in Netherlands and Belgium. We have two own products:
  ➢ a software for the Public Housing sector used by companies which own and rent "social houses" on the Dutch market
  ➢ an integrated information system for Dutch Care Providers which supports all processes

Our company is also dealing with challenging projects representing applications for telecommunications, military industries.

The daily activities include design, development, maintenance and integration of telecom business applications. You will be typically using C# as programming language, Visual Studio 2008 and/or 2010 as development environment and Microsoft SQL Server as data storage engine.

Responsibilities:

  ➢ Build new systems with .NET 4.0 / ASP.NET / VB.NET / SQL Server 2008 / WCF Web Services / WCF Data Services
  ➢ Develop new functionality on our existing software products
  ➢ Lead/mentor developers and share knowledge through knowledge-sharing presentations
  ➢ Participate in a small, experienced, energetic team on a rapid, agile development schedule
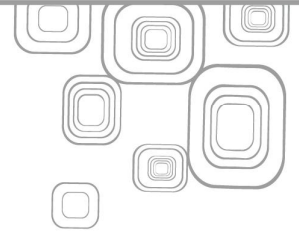

Requirements:

  ➢ Solid knowledge of C# and .NET Framework, OOP concepts, algorithms and data structures
  ➢ Web development experience (ASP.NET, Java script, AJAX, CSS, Infragistics)
  ➢ Knowledge of T-SQL and relational database design
  ➢ Graduate of Computer Science/Cybernetics/Information Technology/Electronics College
  ➢ Fluent in English
  ➢ Ability and willingness to work as part of a team of developers
  ➢ Learning oriented person

Additional advantage:

  ➢ Active Reports, SQL Reporting Services
  ➢ Experience with Silverlight/WPF
  ➢ Experience with NHibernate and/or other ORM frameworks
  ➢ C/C++ knowledge
  ➢ Java knowledge; Install Shield knowledge
  ➢ Active Directory knowledge
  ➢ Knowledge of Microsoft CAB (Composite UI Application Block) technology

What we offer:

- Competitive salary
- Flexible and friendly working environment within a dynamic team
- Access to various training programs
- Private medical insurance
- Meal tickets
- Long term career development programs
- Being part of a growing organization with Belgian roots
