

Sitecore Developer

Job overview:

Cegeka uses an agile software development approach to deliver the highest value to the customer. 'The agile software factory' is a team of one hundred agile developers, customer proxies and scrum masters. We work in intense and close cooperation with the customer.

You'll be working in an established and proven agile environment, with quality oriented developers, like yourself.

Our projects are based in Netherlands and Belgium. We have two own products:

- a software for the Public Housing sector used by companies which own and rent "social houses" on the Dutch market
- an integrated information system for Dutch Care Providers which supports all processes

Our company is also dealing with challenging projects representing applications for telecommunications, military industries.

The daily activities include design, development, maintenance and integration of telecom business applications. You will be typically using C# as programming language, Visual Studio 2008 and/or 2010 as development environment and Microsoft SQL Server as data storage engine.
