## Job Description

The Reporting Analyst GCC is responsible for interpretation of regulatory requirements, turning these into functional and business requirements and using them in the development process. Specific responsibilities and requirements follow.

As a successful candidate you will:

- Be able to take the lead in the product development process for small scale projects (< 150 MD). Guide and steer the project from project initiation towards delivery, including communication with the stakeholders).
- Be able to guide and coach a small project team (< 6) throughout all project phases.
- Play a key role in monitoring and interpreting Regulatory changes in the financial sector (Banking, Insurance, etc.).
- Work closely with the technical team to ensure that they have a clear understanding of requirements and support them throughout the development process.
- Perform functional testing of the software packages to be delivered, controls adequacy of developments with functional specifications
- Participate actively to product documentation, in particular for the functionalities you specified.
- Participate to product second line support by analysing reported customer issues and providing resolution recommendation.
- On occasion, deliver workshops related to specific reporting products and applications.
- Maintain regular contact with fellow business professionals and Regulatory bodies to discuss the effect and interpretation of regulatory changes and to maintain a high standard of business expertise.

## Qualifications and Skill Set

### Education:

- Bachelor degree (or higher) degree in accounting, economics or finance

**Experience:**

- At least 5 years' experience in banking accounting and / or in a functional analyst role, within a bank or within a software company delivering financial software or within financial services.
- In-depth knowledge and understanding of financial concepts and instruments.
- Relevant experience and knowledge of banking regulatory requirements.
- In depth knowledge on Credit Risk and Liquidity Risk and/or IFRS, US GAAP is an asset.
- Experience of working with financial software, particularly with regard to banking and regulatory data warehouses or reporting solutions.
- Ability to analyse financial regulation and to translate into functional requirements.
- Fluency in English, written and oral; knowledge of other European languages is an asset.
- Computer literate, relational database and SQL knowledge is required.

**Personality / Personal traits:**

- Must have analytical and problem-solving skills with keen attention to detail.
- Excellent communication (written and oral) and interpersonal skills.
- Responsible, methodical and organised.
- Assertive, being able to make expert decisions based on personal judgement.
- A team worker/player with an outgoing personality.
- Quick to learn and put data to productive use.
- Flexible and open to change.
- Coaching skills, ability to take the team members to a higher level.
- Comfortable in explaining and defending his/her ideas, while still able to recognize the merits of others' opinions.
- Demonstrating commitment and results-oriented.
- Fluent in English, both written & spoken.
- Obsessed by quality and passionate about his/her work.
- Available to travel from time to time (EMEA and also to US or APJ)
