

Want a step-up in your career? Looking for new challenges?

Data Warehouse Testing Consultants - Let the right career opportunity find you!

We are looking for Data Warehouse or PL/SQL professionals that are interested in Data Warehouse.

Main Tasks & Responsibilities:

- Be part of the Data Warehouse team responsible for the testing and quality assurance of a large Data Warehouse implementation;
- Define test plans and detailed test cases for new releases;
- Execute and record results for the allocated test plans and test cases;
- Report to IT and Business stakeholders on the progress and results of testing activities.

Requirements for the role:

- Strong technological background, with degree level qualification in Information Technology, Computer Science or relevant discipline;
- Strong knowledge of SQL;
- Proven Oracle PL/SQL experience with testing large systems or previous PL/SQL development experience; Knowledge of Business Intelligence would be an asset;
- Knowledge of Business Intelligence tools;
- Knowledge of Data Warehouse design;
- Good knowledge of UNIX based Operating Systems;
- Basic knowledge of UNIX scripting;
- Ability to work in fast paced environment;
- Good English level.

Prior experience with any of the following would be a plus, but is not mandatory:

- HP ALM;
- Informatica, Business Objects, MS Reporting Services.

Soft skills:

- Highly organized and able to demonstrate excellent time management;
- Willingness to learn, flexible and adaptable;
- Ability to work independently and as well as part of a team.

We offer:

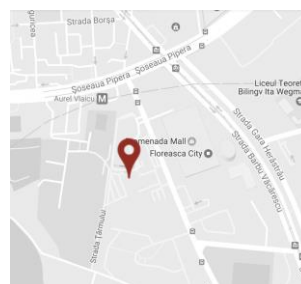

- An attractive remuneration package;
- Meal tickets;
- The right mix of challenges, learning and development opportunities;
- Professional but friendly working environment;
- Special events for employees (teambuilding, parties etc.)
