

Database Analyst

Ipsos Interactive Services is hiring a young and promising Database Analyst, who likes to work with numbers, applications and databases.

This position is open in the Panels Database Team in Ipsos Interactive Services Romania. Panels Database Team is in charge with administrating a large database of respondents from all over the world, who registered with Ipsos to take part in market surveys.

You will be in charge with:

- Database management (cleaning, maintaining, update);
- Registering new respondents;
- Updating their information collected in monthly maintenance surveys using an internal application;
- Monitoring respondents behavior;
- Running reports and analysis on different items

Building specs and testing internal applications.

Requirements:

- University studies (Cybernetics, Mathematics, Statistics);
- Good analytics and reporting skills;
- Good Excel knowledge;
- SQL 2005/ 2008;
- Good command of English language (comprehension, written and speech).

You should be organized and responsible, paying attention to details, and you should have a great amount of logical thinking. We value above all proactive persons, and the ability to work in a team.
