PHP Senior Full Stack Web Developer

Senior Full Stack Web Developer
Department: WEB Team
No. of job openings: 1

Company description
Sparkware is a new SW development center established in Romania providing SW development services to the online gaming entertainment companies. Sparkware develops and manages principal aspects of online gaming elements, including software development of online platforms infrastructure, backend, back office tools, payment processing, CRM, risk management and SW clients using various technologies such as Flash, .Net, C++,SQL DB, PHP, HTML#5 etc.
The office is located in Bucharest.

We are looking for a senior PHP full stack web developer to work on our next generation Casino web platform. On the frontend you should be comfortable with HTML5, CSS and Javascript. On the backend PHP, and any modern object oriented frameworks such as Cake, Slim, Yii etc.

About the role:
As a PHP full stack developer, you will be responsible for the architecture, design and implementation of web elements on both front end and back end components for mobile and PC. You will work closely with product managers and designers.

Responsibilities:
- Design and create reusable code
- Identify and solve server/client problems
- Achieve goals within reasonable time frames based on project requirements
- Create internally used tools to ease QA and workflow
- Analyze and optimize server/client performance
- Prioritize tasks and spend reasonable amount of time on each task to balance between effort and gain
- Work with other developers to solve hard problems
- Contribute to the design of new features
- Support and maintain existing projects

Requirements:
- +3 Experience with server-side object oriented programming using PHP.
- +3 Experience with client-side technologies and HTML5 frameworks (React, Backbone, Angular, Underscore, Bootstrap, Grunt/Gulp, Sass, etc..)
- Experience with technical operations to support deployments to production and DevOps
- Experience working with and building RESTful APIs

- Solid understanding of MVC/MVP or MVVM design patterns
- Ability to write SQL/NoSQL and work with databases
- Experience in a full product cycle development
- Eager to learn new concepts and new technologies
- Be passionate about code, be creative, and have a can do attitude
- Experience in developing Mobile Web Application - advantage
- Experience with Node.js/npm/Bower – advantage
- Experience with developing CMS systems from scratch – advantage
- Experience with unit testing, PHPUnit etc – advantage
