

HTML5 Developer

Department: Casino HTML5 Games

No. of job openings: 1

Company description

Sparkware is a new SW development center established in Romania providing SW development services to the online gaming entertainment companies. Sparkware develops and manages principal aspects of online gaming elements, including software development of online platforms infrastructure, backend, back office tools, payment processing, CRM, risk management and SW clients using various technologies such as Flash, .Net, C++,SQL DB, PHP, HTML#5 etc.

The office is located in Bucharest.

We are looking for a dynamic and highly motivated professional, qualified QA engineer, which will join our testing team. The testing team is responsible for testing both infrastructure functionality and look and feel of the application. The testing team is a very central and important one and is responsible for many of the major processes within the company.

Job Description:

We are looking for an experienced developer with a passion for mobile games to join our in house casino games development team.

Job responsibilities

- Design and develop the premium games of the company.
- Work closely with graphic designers and product on making the best games in the market.
- Write optimized code that runs on all web browsers and in all platforms, from mobile to PC.
- Be a part of the game lifecycle, from concept to production.

Skills – Requirements:

- 2+ experience in object oriented client development using JavaScript/Java – A must
- Experience in a full product cycle development.
- Experience in client side technologies and HTML5 frameworks: CSS3/Canvas/phaser.js- an advantage
- Mobile games development experience – Big advantage
- Be passionate about code, be creative, and have a can do attitude.
- Fluent in English
