Producătorul american de soluții informatice pentru sectorul financiar-bancar, Misys Banking Systems se bucură de peste 2.000 de clienți în peste 130 de țări. Aici vei putea realiza o creștere exponențială în carieră și vei avea acces la programe de formare profesională, timp în care eforturile tale recompensate pe măsură.

Noi credem că totul începe cu talent. Fiind una dintre cele mai mari și cele mai dinamice companii de software din lume, suntem mereu în căutare de oameni cu aptitudinile, experiența si atitudinea potrivită pentru a ne permite să ne îndeplinim visul: de a face lucrurile care contează cu adevărat și de a fi admirați pentru asta.

Junior Technical QA Engineer (CapitalMarkets Fusion)

Location: Bucharest, RO

Job Type: Full Time

The Team

Quality Assurance team is made out of young and energetic people responsible for helping ensure product quality, through the planning and execution of product testing, and/or process/product standards compliance.

The Product

FusionCapital Summit is a proven, award-winning solution in the OTC derivatives market. Built on over 20 years of market expertise, it helps banks meet these challenges head-on

and stay one step ahead. It offers a functionally rich core trading solution for treasury and capital markets that supports business growth, improves straight-through processing (STP), shortens time to market while reducing costs.

The Responsibilities

Technical QA Engineer will be responsible for maintaining of QA environment, increasing technical tests coverage of Treasury Capital Markets applications and running technical tests. The selected candidate will partner other teams in the development center to test new or existing software in order to ensure requirements are met.

Primary Responsibilities:

· Manage QA environment (Windows/UNIX/Linux applications), write complex Windows/UNIX scripts

· Define, design and run technical tests on Summit products (installation of Misys software, stability, performance, scalability tests)

· Analyze tests results, capture and validate bugs, communicate accurate test reports to other teams

· Configure and manage MS SQL and Sybase dataservers/instances and databases

· Install, upgrade and configure Summit applications and third parties (Orbix,Tomcat, TIBCO products)

QUALIFICATION:

A bachelor or master degree in IT (preferable computer science)

MANDATORY SKILLS:

· Experience in development and maintenance of complex UNIX shell scripts

· Experience in development and maintenance of complex Windows batch scripts

· Advanced knowledge about UNIX/Linux - (Solaris, RedHat preferred)

· Experience in Solaris zones

· Basic experience in virtualization

· Experience in Web Application Servers (Tomcat, Weblogic, JBoss preferred)

· Fluency in English

· Able to work in a multi-cultural and multi-sites team

· Strong Analytical, Communication and Problem Solving skills

· Autonomous

OPTIONAL SKILLS:

· Deployment and maintenance of complex software applications

· Knowledge of test tools (HP Performance Center, HP Quality Center, automated testing tools)

· Knowledge of financial applications
