## **Position: QA Engineer Back Office**

### **Company description**

Sparkware is a new SW development center established in Romania providing SW development services to the online gaming entertainment companies. Sparkware develops and manages principal aspects of online gaming elements, including software development of online platforms infrastructure, backend, back office tools, payment processing, CRM, risk management and SW clients using various technologies such as Flash, .Net, C++, SQL DB, PHP, HTML#5 etc.

The office is located in Bucharest.

Sparkware has just started an intensive recruitment process and plan to employ about 150 people with various professions such as developers in various domains such as DBA, QA, integrators, creative teams and more.

We are looking for a dynamic and highly motivated professional, qualified QA engineer, which will join our testing team. The testing team is a very central and important one and is responsible for many of the major processes within the company.

### **Main Responsibilities**

- Review specification and design documents
- Create and maintain test plans and test cases
- Report, manage and track bugs in our applications.
- Working closely with different interfaces like developers, Product managers and Project managers.

### **Skills**
