

Software Developer

NetProtect Unix, Bitdefender, Bucharest

JOB RESPONSIBILITIES

The NetProtect Unix team is looking for a passionate software developer with very good scripting skills to help develop and maintain our product portfolio.

REQUIREMENTS

Minimum skills and expertise:

- at least three years of experience in software development on Linux
- good knowledge of one or more scripting languages (python, perl, shell etc.)
- good knowledge of Debian and Red Hat (CentOS) package management systems
- basic knowledge of virtualization technologies (KVM, Xen, VMware etc.)
- experience with working in highly technical teams
- experience with creating clean code

Would be a plus:

- participation in an open source project

JOB OFFER

If you join us, you will:

- work on great technologies & products
- be a member of a great and highly knowledgeable technical team
- be part of a multinational company
- be involved in generating ideas about the product features
- have access to leisure rooms (foosball, pool, Wii, darts)
- enjoy a competitive salary, as well as medical and accident insurance
