

Producătorul american de soluții informatice pentru sectorul financiar-bancar, Misys Banking Systems se bucură de peste 2.000 de clienți în peste 130 de țări. Aici vei putea realiza o creștere exponențială în carieră și vei avea acces la programe de formare profesională, timp în care eforturile tale recompensate pe măsură.

Noi credem că totul începe cu talent. Fiind una dintre cele mai mari și cele mai dinamice companii de software din lume, suntem mereu în căutare de oameni cu aptitudinile, experiența și atitudinea potrivită pentru a ne permite să ne îndeplinim visul: de a face lucrurile care contează cu adevărat și de a fi admirați pentru asta.

## **Associate Software Engineer FusionCapital Sophis**

Location: Bucharest, RO

Job Type: Full Time

### The Team

The Engineering Support Group (ESG) is a global network of professionals with expertise across Misys broad product portfolio. This Group is made up of product experts that work closely with the Research & Development, Professional Services and Customer Support organizations.

### The Product

We take a multi-function approach to investment management that helps boost productivity and reduce costs. FusionInvest can handle the complete trading lifecycle from portfolio management, to investment operations, to risk management and compliance across a wide range of asset classes. More than 90 buy-side customers rely on our solutions, including some of the world's top asset managers, hedge funds and pension funds.

## The Role

His / Her main tasks will include investigation of issues and perform its qualification as Bug, Normal Behavior or Enhancement Request. Whenever a case is classified as a bug, you will be responsible for searching for a potential workaround that may unblock the client and provide a clear functional description of the problem, root cause analysis and how to reproduce scenario to Level 3.

## The Responsibilities:

As a member of the ESG team your responsibilities will include but are not limited to:

1. Maintaining the Misys products and improving existing modules
2. Investigating technical (and functional if needed) defects and propose adequate solutions
3. Providing maintenance for existing projects
4. Writing technical specifications & best practices documentation

## The Required Skills, Knowledge & Experience:

- University degree: Computer Science, Mathematics, Business IT (ASE)
- Good knowledge of C/C++, C#, Java, XML
- Mandatory knowledge of SQL and database management
- Good English knowledge
- Commitment, stability, responsibility
- Ability to work independently as well as being a team player
- Time management skills and the ability to work under tight time constraints

The role reports into the FusionInvest ESG Manager
