WEB PHP / ASP.NET Developer

Ideal Candidate:

Are you a passionate developer of web sites or mobile applications? Tired of the small web sites and wanting to work on big projects alongside a great team? Are you looking to master the art of code writing?
Then you might be a good fit for working at Clarisoft :-)

What are we looking for?

• Software developers for web sites (mostly PHP or ASP.NET) or for mobile (iOS or Android) that enjoy challenges, ask questions and pay attention to details, learn new things or technologies and apply them creatively to solve the problems at hand.
• Do you know other languages but want to learn something new? Are you at the start of your career and highly motivated? You can still apply.
• We hire for attitude and train for skills.
• And if you are at or finished an IT university you are lucky in-deed: you do not need a mandatory experience, you will be like in kindergarten taking care of you and doing what you want and you are also being paid to do it.

Knowledge some of the following is a plus:

• jQuery, AJAX
• MySQL, MS-SQL
• JSON/XML handling, communications with web services (HTTP, SOAP, REST)

Your responsibilities:

• Include everything related to code: write it, debug it, test it before sent it to QA.
• We like you to challenge us, think of better solutions or designs, and tell us how can we improve our environment, participate in multiple projects, share your knowledge with the others, and be an excellent team player.
